1. Management Performance and Financial Conditions

(1) Management Results

As a direction of the HCM Group's medium-term management strategy, in order to further strengthen the value chain business, on which the Group has been focusing, the Group is using digital technology to provide even deeper solutions at every point of contact with customers, and is working to transform itself into a corporate structure that is resilient to change.

During the 2Q of the current fiscal year (April 1, 2020 to September 30, 2020), revenues from rental and used equipment increased year-on-year, but overall revenues fell sharply to ¥360,902 million (a decrease of 24.9% year-on-year). This was mainly due to a decrease in sales of new machinery and parts & services due to a deterioration in the market caused by COVID-19, a decrease in sales of new mining machinery and parts & services due to restrained capital expenditure due to sluggish resource prices and other factors, and the impact of the yen's appreciation compared to the previous fiscal year. These factors were partially offset by an increase in sales of rental and used equipment compared to the same period of the previous fiscal year in the value chain business, on which we are focusing.

As for consolidated income items, adjusted operating income was ¥10,939 million (a decrease of 75.7% year on year), mainly due to a decrease in revenue and the impact of the yen's appreciation. Quarterly profit attributable to owners of parent was ¥211 million (a decrease of 99.2% year-on-year), affected by foreign exchange losses due to the appreciation of domestic currencies at overseas bases, income tax expenses, and non-controlling interests' gains and losses.

Business results by segment are described below.

1. Construction Machinery Business

Demand for hydraulic excavators in the consolidated cumulative 2Q was significantly lower than that in the same period of the previous fiscal year in major regions except China. Demand for mining machinery was also marked by restraints on capital investment by mining companies, and demand from small and medium-sized mining companies declined significantly in particular.

As a result, although rentals and used equipment rose, revenues for the first half of the fiscal year under review amounted to ¥320,216 million (a decrease of 26.3% year-on-year), mainly due to the decline in sales of new machinery and parts & services, as well as the impact of the yen's appreciation, due to the sluggish markets caused by COVID-19.

Adjusted operating income was ¥7,159 million (a decrease of 82.5% year-on-year), mainly due to a decrease in revenue and the impact of the yen's appreciation.

2. Solution Business

This segment consists primarily of Bradken Pty Limited and its subsidiaries, which are engaged in the parts service business in the after-sales sales of mining facilities and machinery, and H-E Parts International LLC and its subsidiaries, which provide service solutions.

Sales of consumables for processing facilities operating at mining companies remained steady, reaching ¥42,071 million (a decrease of 11.5% year-on-year), despite a decrease in sales revenues in the 2Q of the fiscal year.

Adjusted operating income was ¥3,780 million (a decrease of 8.2% year-on-year), due in part to the effects of business restructuring, despite the decrease in revenue and the impact of the yen's appreciation.

The above revenues of segment 1 and 2 are figures before intersegment adjustments

(2) Outlook for the Fiscal Year Ending March 2021

In the fiscal year ending March 31, 2021, we forecast that demand for hydraulic excavators will be upwardly revised from the outlook announced on May 28, 2020, to approximately 19,5000 units worldwide (a decrease of 10% year-on-year), because demand decrease for hydraulic excavators during the cumulative 2Q was limited compared to the original forecast, although there are concerns about the second wave of COVID-19.

On the other hand, in the mining machinery, demand for new machinery is expected to decline as customers' new investment is becoming increasingly restrained due to falling resource prices and global economic uncertainty. Despite the impact of COVID-19, some countries and regions continued to operate mining operations as essential business supporting social infrastructure. However, sites were shut down in some regions, and as a result, we expect revenue from our parts & services and solutions businesses to decline year-on-year.

Based on the above projections, the consolidated financial forecast for the fiscal year ending March 2021 (April 1, 2020, through March 31, 2021) has been left unchanged from the forecast announced on May 28, 2020, taking account of the impact of the reduction in demand caused by the prolonged effects of COVID-19 and other concerns.

As for foreign exchange rates for the 3Q onward, which are the assumptions for the forecasts for the current fiscal year, the Company will maintain the rates of ¥105 to one US dollar, ¥120 to one euro, ¥15.0 to one Chinese yuan, and ¥72 to one Australian dollar.

(Segment Information)

1. Reportable segment information

1) Overview of business segments

The operating segments of the Group are the components for which separate financial information is available and that are evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. The reportable segments are determined based on the operating segment.

Taking into consideration the nature of products and services as well as categories, types of customers, and economic characteristics in a comprehensive manner, the company determines to classify two reportable segments as follows: The Construction Machinery Business Segment primarily intends to provide customers with a series of total life cycle solutions related to construction machinery such as the manufacture and sale of hydraulic excavators, ultra-large hydraulic excavators, and wheeled loaders, as well as the sale of parts related to these products. The Solution Business Segment primarily intends to provide services, production, and distribution parts that are not included in the Construction Machinery Business Segment.
