

REMANUFACTURED

HYDRAULIC CYLINDER

Cylinder that is reborn after being repaired and rebuilt with Hitachi Construction Machinery's advanced technologies.

Hitachi Construction Machinery

REMANUFACTURED

Our Remanufacturing Business

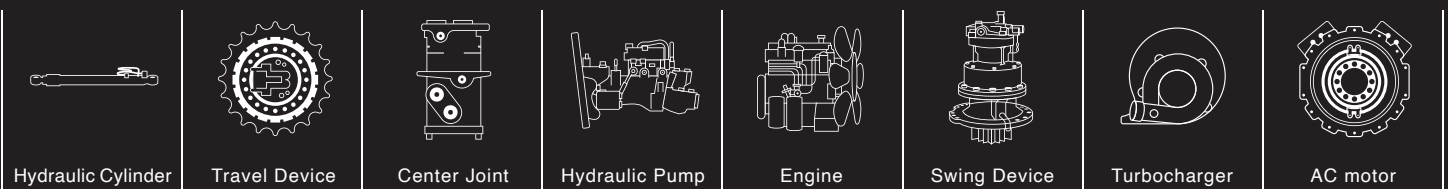

Hitachi Construction Machinery's remanufacturing business began in the 1970s. Our plants are located globally and production is under strict quality control. Used components are disassembled by expert technicians and are reborn as highly reliable products by using genuine replacement parts.

Advantages of our remanufactured Cylinders

The cylinder works as the Operator's arm. High cylinder performance leads to smooth operation. Our remanufactured cylinders support your jobsite with the same performance as new ones.

Lineup

There are many other line-ups available. Please contact your nearest Hitachi Construction Machinery dealer.

Correct operation and consideration for your surroundings are the first steps towards safe operation. Before using the machine, be sure to read the "Instruction Manual" carefully and use the machine correctly.

These specifications are subject to change without prior notice. Illustrations and photos show the standard models, and may or may not include optional equipment, accessories, and all standard equipment & parts with some differences in color and features. Before use, read and understand the Operator's Manual for proper operation.
