Reliable solutions

REMANUFACTURED

ENGINE

Engine that is reborn after being repaired and rebuilt with advanced technologies.

Hitachi Construction Machinery

REMANUFACTURED

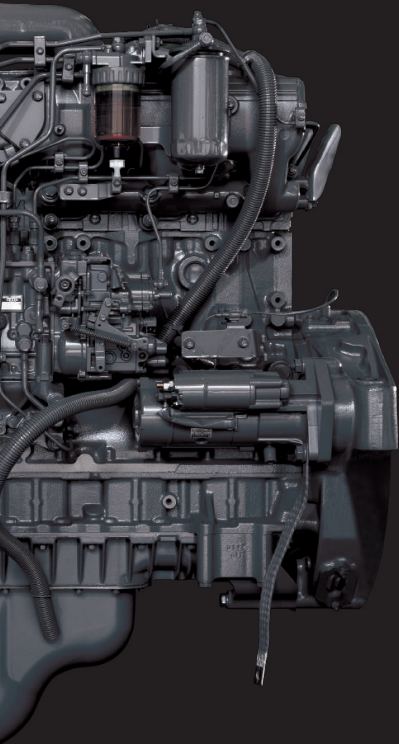

© Hitachi Construction Machinery Co., Ltd.

Our Remanufacturing Business

Hitachi Construction Machinery's remanufacturing business began in the 1970s. Our plants are located globally and production is under strict quality control. Used components are disassembled by expert technicians and are reborn as highly reliable products by using genuine replacement parts.

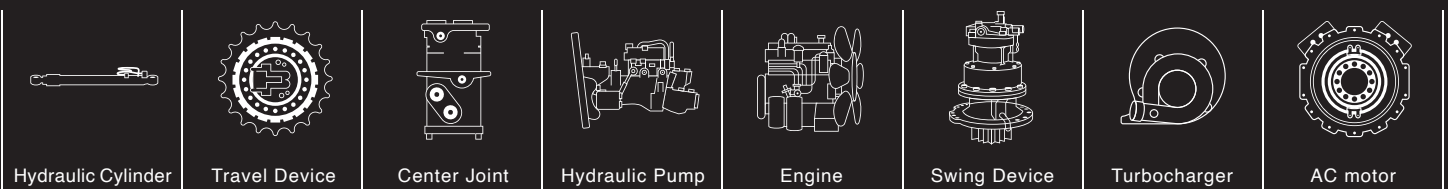

Advantages of Our Remanufactured Engines

The engine serves as the heart of the machine. The movement of the engine leads to the performance of the entire machine. Our remanufactured engine boosts engine power to perform the same as new.

- Reasonable price**
Could be purchased at a lower price than new engines.
- High quality**
Have the same performance as new engines, having passed the same strict quality standards and performance tests
- Warranty**
Have the same warranty as new engines.
- Shorter downtime**
Utilizing our remanufactured engines reduces the loss of machine uptime as there is no need to spend time in repairing them.
- Environmentally friendly**
The use of recycled parts reduces environmental impact by reducing the disposal of parts.

Lineup

There are many other line-ups available. Please contact your nearest Hitachi Construction Machinery dealer.

Please scan the QR code with your smartphone to watch our promotional video.

Correct operation and consideration for your surroundings are the first steps towards safe operation. Before using the machine, be sure to read the "Instruction Manual" carefully and use the machine correctly.

These specifications are subject to change without prior notice. Illustrations and photos show the standard models, and may or may not include optional equipment, accessories, and all standard equipment & parts with some differences in color and features. Before use, read and understand the Operator's Manual for proper operation.
