

Hydraulic Pump

Remanufactured Hydraulic Pump

HITACHI

Reliable solutions

Hydraulic pump has important function in the stable operation of hydraulic excavators. It changes hydraulic oil to high-pressure and enables operation such as moving, swing, and excavation.

Hitachi Construction Machinery's remanufactured hydraulic pumps provide customers with high value in terms of cost and quality.

Hitachi Construction Machinery

REMANUFACTURED

Recommended when in the following situations

There are signs of trouble on the machine

- No force in operation, pressure does not rise
- Abnormal noise
- Parts heats up
- Insufficient driving power

When you are worried about parts selection

- Quality concerns about repaired and used parts
- Delayed machine recovery with repairs
- Keep costs low
- Reduce waste

Benefits of remanufactured parts

Quality that clears strict standards

Remanufactured parts have the same strict quality standards as new. Only remanufactured parts that have passed rigorous performance tests will be delivered to customers around the world. The logo mark certifies that it is the genuine remanufactured parts of Hitachi Construction Machinery.

Hitachi Construction Machinery

REMANUFACTURED

Same manufacturer's warranty as new parts

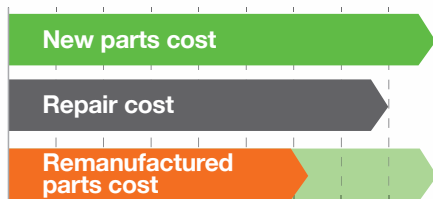

It comes with the same warranty as new parts.

Reduction of machine down time

Since it can be replaced on a component-by-component basis, down time can be shortened compared to when repairing.

Cost benefits

By using remanufactured parts, customer can purchase cheaper than new parts, and the cost is stable compared to repairs.

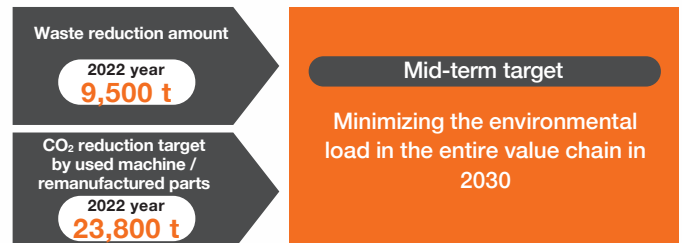

Cost benefits

Contribution to the environment

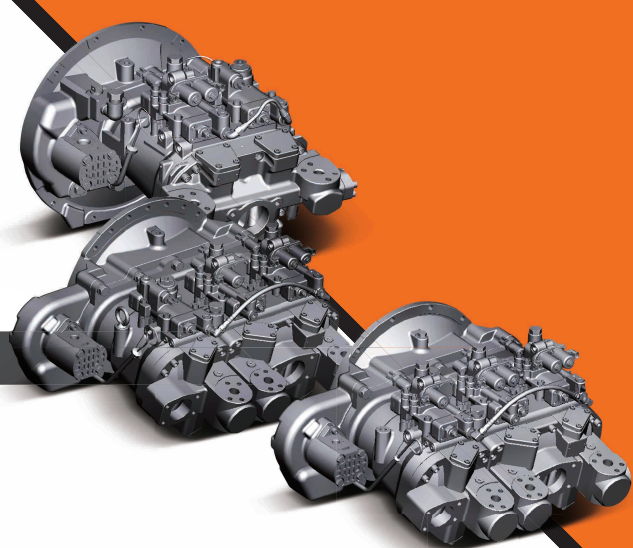

(Efforts to realize circular economy)

Hitachi Construction Machinery is expanding remanufacturing business globally. By using remanufactured parts, customers can contribute to the realization of environmental protection and circular economy.
