

BUILT FOR HEAVY DUTY PERFORMANCE

Hitachi Construction Machinery Malaysia has been developing a wide range of application products to meet our customers' needs. Our unique application machines provide efficient and safe operation, combined with durable and reliable key technologies derived from our extensive experience in the global excavator business.

Hydraulic Rotation Grapple

For all sorts of gripping work, from dismantling wooden houses to steel scrap, rebar processing, sorting of raw wood and miscellaneous wood

- Equipped 360 degrees Rotation system.
- Can use Rotation system by Breaker piping.
- Equipped replaceable teeth on tip of claw
- Have 3 types of Rotation Grapple :
 - One cylinder type (SG)
 - Double cylinder type (D)
 - Wood grabbing type grapple (SW)

Hydraulic Magnet Attachment

The scrap and demolition industries have many unique and demanding applications for excavator magnet systems. Hitachi Construction Machinery offers a variety of Scrap & Demolition Magnets, each designed for top operational efficiency and lasting durability.

- Engineered for Hydraulic Driven Systems
- Delivers an Additional 30 % Lifting Power
- Swiftly and Precisely Handles Ferrous Materials
- Ensures Enduring Durability in Diverse Job Site Conditions
