

ZAXIS-7G series

HITACHI

Reliable Solutions

ZAXIS490/550

Hitachi Construction Machinery Group
LANDCROS
Japanese Excellence—Reliable Solutions

HYDRAULIC EXCAVATOR

Model code : ZX490-7G / ZX490LC-7G

Engine rated power : 296 kW (397HP)

Operating weight : 46 500 - 49 000 kg

Bucket capacity : 1.60 - 3.40 m³

ZX490H-7G / ZX490LCH-7G

296 kW (397HP)

47 000 - 48 900 kg

1.90 - 3.00 m³

ZX490LCR-7G

296 kW (397HP)

48 400 - 48 900 kg

1.90 - 2.50 m³

ZX550LC-7G

296 kW (397HP)

54 700 kg

4.0 m³

GET MORE FROM YOUR MACHINE

You're at the heart of Hitachi Construction Machinery's design for its latest range of excavators. To continuously improve on previous generation machines, we've focused on enhancing your profit in business.

We have made cost reduction for our customers our top priority and, in doing so, have achieved reduced fuel consumption. The cab has been redesigned to improve the operator's working environment and controllability, with production also expected to improve. An engine that already has a proven track record of high reliability has been adopted, and we have placed further work in it to make it even more robust. Remote failure diagnosis, monitoring, and OTA (Over The Air - controller rewriting) are also supported to reduce downtime.

INSIDE

4-5 | MORE PRODUCTION LOWER FUEL CONSUMPTION

6-7 | BETTER OPERABILITY

8-9 | HIGH DURABILITY AND RELIABILITY

10-11 | GREATER DURABILITY IN QUARRY SITES R-series

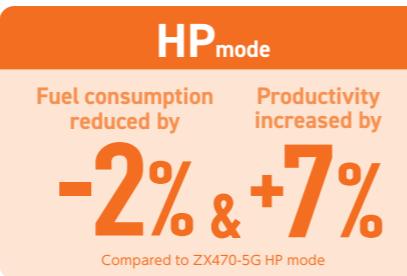

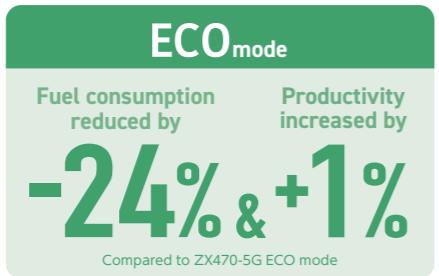

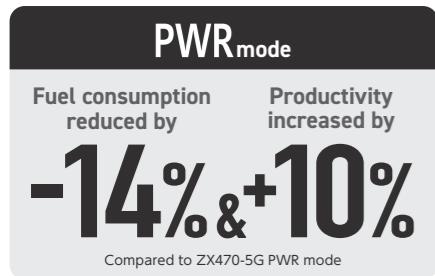

12-13 | SMOOTH MAINTENANCE

14-15 | MACHINE MANAGEMENT

MORE PRODUCTION LOWER FUEL CONSUMPTION

The HIOS-V new Hydraulic system has achieved both increased productivity and reduced fuel consumption in each mode. The ZAXIS performance contributes to increase the returns to the customer.

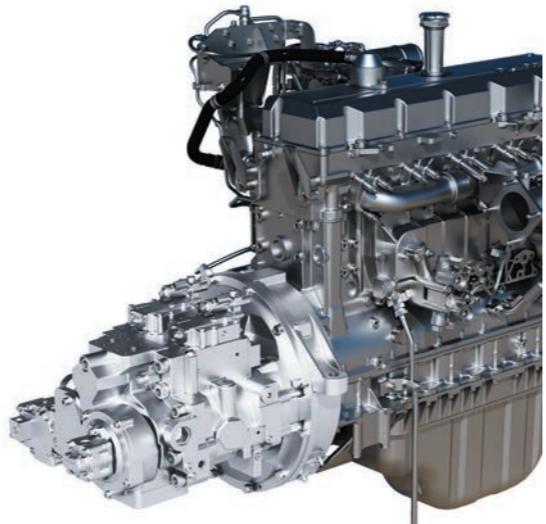

Note: The above figures only apply to the ZX490 class.

HIOS-V Hydraulic system

The hydraulic system developed was based on the concept of a hydraulic system that fits in-line with a sense of human operation.

- ✓ Efficient hydraulic control achieves smoother and more speedy movement of front attachments.
- ✓ Fine-tuned hydraulic pump control according to work load reduces fuel consumption and supports cost reductions.

Reduced oil pressure loss

A new valve has been adopted to reduce hydraulic loss and further improve hydraulic efficiency.

- ✓ Contributing to low fuel consumption operation

High power engine

Rated power has been increased from the conventional ZX470-5G engine contributing to greater work volume.

- ✓ Increased workload

	ZX470-5G	ZX490-7G
Rated output (ISO 14396:2002)	235kW	296kW

High efficiency operation support system

ECO gauge

The current fuel consumption is indicated by segment display, prompting the operator to better fuel economy. The lower the fuel consumption, the higher the segment.

Easy to be removed and cleaned

BETTER OPERABILITY

In the cab of the ZAXIS-7G, enhanced comfort and safety features are at your fingertips, offering the power to perform greater productivity with ease as well as reduced fatigue.

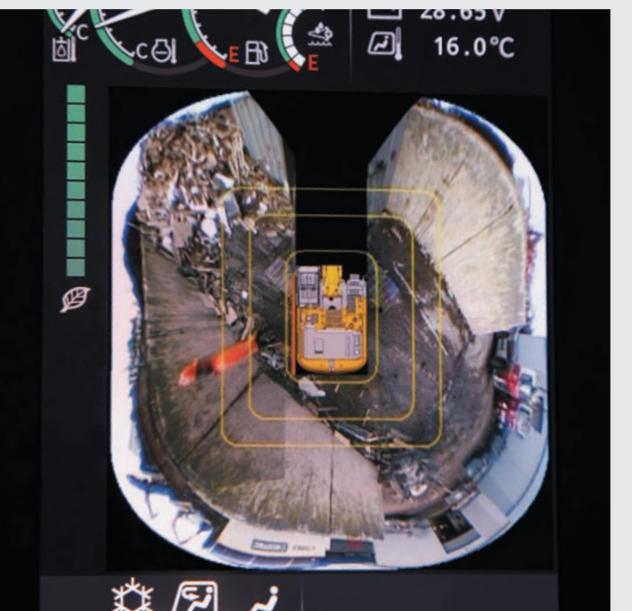

Operation is easy with ergonomically designed controls and switches.

Low-reflective color 8" monitor, 42% larger display compared to ZX-5G series.
Easier to view and navigate. Bluetooth® and USB power supply available.

New designed pilot shut-off lever
The newly designed pilot shut-off lever allows easier locking and unlocking with wrist operation.

AERIAL ANGLE (Optional)
270-degree bird's eye-view camera system is available as an option.

HIGH DURABILITY AND RELIABILITY

Completing a project on time and on budget depends on the ability of your construction equipment to perform all day, every day. That's why Hitachi construction machinery owners have profited from generations of reliable and durable machinery. Hitachi Construction Machinery is always conscious of improving long-term reliability in its machine development. High long-term reliability is good in not only performance all day, every day but also for resale value.

H Boom

Complete joint penetration has been applied to areas where the load is focused, and durability and reliability have been further improved.

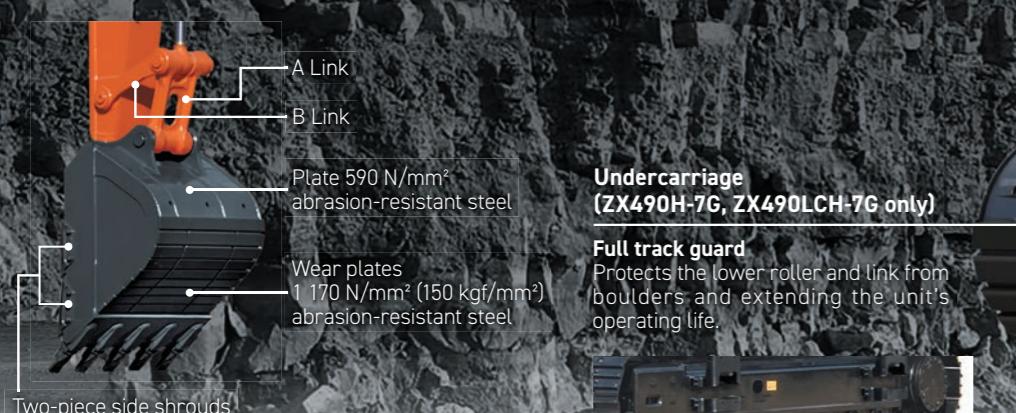

H Arm

A forged boss is used in the arm rod. Complete joint penetration has been applied to areas where the load is focused, and durability and reliability have been further improved.

Rock bucket (ZX490H-7G, ZX490LCH-7G only)

A rock bucket has been adopted in consideration for sites requiring heavier excavator work. Equipped with horizontal wear plates and two-piece side shrouds for increased durability.

Undercarriage (ZX490H-7G, ZX490LCH-7G only)

Full track guard
Protects the lower roller and link from boulders and extending the unit's operating life.

Equipped with an Expansion tank

✓ Improving the reliability of the engine cooling performance

An engine with improved reliability

The engine is a highly reliable model that has already been adopted previously. In adopting it for the ZX-7G, we have put in our efforts to further increase durability and to BOOST your uptime. EGR (Exhaust Gas Recirculation) is removed from the engine, increasing its durability for using low-quality fuel.

H/R Cab (ZX490H-7G, ZX490LCH-7G only)

A reinforced cab for H&R specification machines with a reinforced windshield and a FOPS* guard that protects the cab from falling objects. The front has a laminated straight glass front window that shuts out dust. The cab front guard (optional), also complies with the ISO standard OPG**.

*FOPS: Falling-Object Protective Structure

**OPG: Operator Protective Guards

Reinforced undercover (ZX490H-7G, ZX490LCH-7G only)

Photo:ZX490LCH-7G

GREATER DURABILITY IN QUARRY SITES R-series

Realizing higher quality and stronger durability

"Abrasion-resistant steel has been adopted, and strength has been further increased by changing the structure."

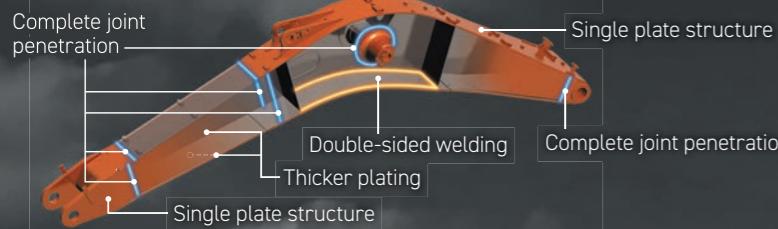

"Durable front structure and joints"

"Reinforced undercarriage that can withstand severe ground conditions"

Achieved stronger durability that meets customer needs.

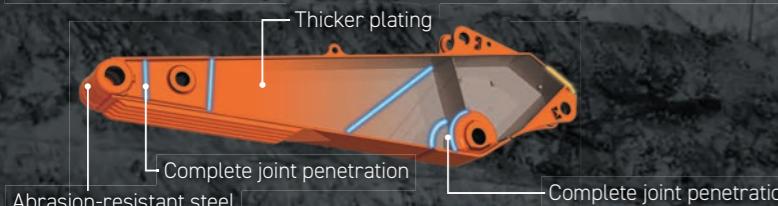

R Boom

Double-sided welding and complete joint penetration are applied to improve the rigidity and durability of the boom. Durability is also improved by the boom end side plate's single plate structure, thicker boom end bush and other various components.

R Arm

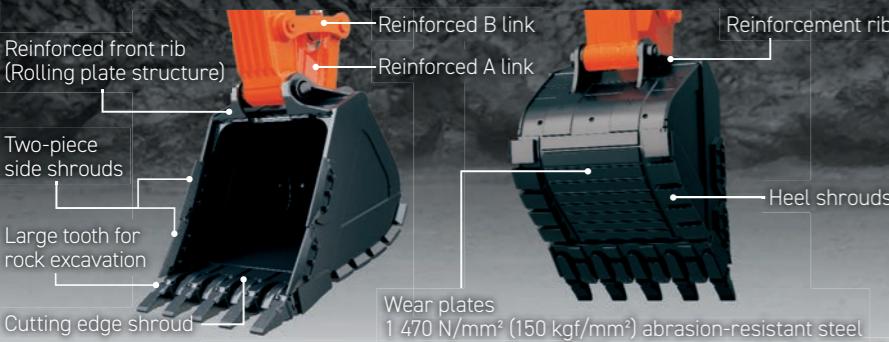

Thicker arm side frames are installed, improving durability. Arm dent prevention plates and five square bars prevent the deformation of the arm during digging and loading of limestone and crushed stone.

R Bucket

R bucket for crushed stones: High durability by adopting abrasion-resistant steel, two-piece side shrouds, cutting edge shrouds, and large bucket claws for rock excavation. The side wear plate is made of 1 470 N/mm² (150 kgf/mm²) class abrasion-resistant steel that has high wear resistance and is easy to repair by welding. Repair work such as replacements can also be done relatively easily.

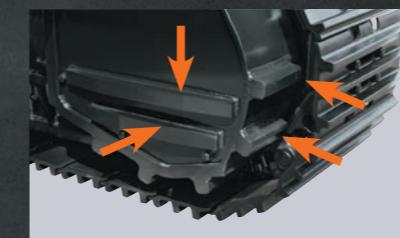

R Bucket for limestone: Limestone has slightly sticky properties and can be tough to work with, and places a large load on the front structure during excavation. For this reason, the R bucket designed for limestone has a structure that emphasizes crack prevention. The arm mounting bracket has been strengthened with added ribs. Impact resistance is improved by increasing the length of welded part. In addition, 1 470 N/mm² (150 kgf/mm²) grade abrasion-resistant steel is used to improve wear resistance.

Undercarriage

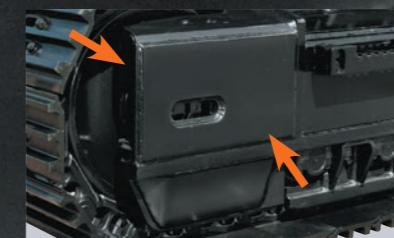

Reinforced travel motor guard

Protects the travel motor from rocks and prevents the damage to travel motor.

Reinforced idler bracket

The idler bracket is strengthened to cope with frequent impacts.

Full track guard

Protects the lower roller link from rocks and extending the unit's operating life.

H/R Cab

A reinforced cab for H&R specification machines with a reinforced windshield and a FOPS* guard that protects the cab from falling objects. The front has a laminated straight glass front window that shuts out dust. The cab front guard (optional), also complies with the ISO standard OPG**.

*FOPS: Falling-Object Protective Structure

**OPG: Operator Protective Guards

SMOOTH MAINTENANCE

Regular maintenance is essential for the machine to achieve high performance.

Hitachi's excavator is designed for ease of regular maintenance. Simple and easy maintenance keeps the machine in good condition and keeps its high performance.

Easy-access air conditioner condenser

- ✓ The cover can be opened without the need for any tools
- ✓ Easy to clean Radiator/Oil Cooler/Inter cooler core with simple air blowing

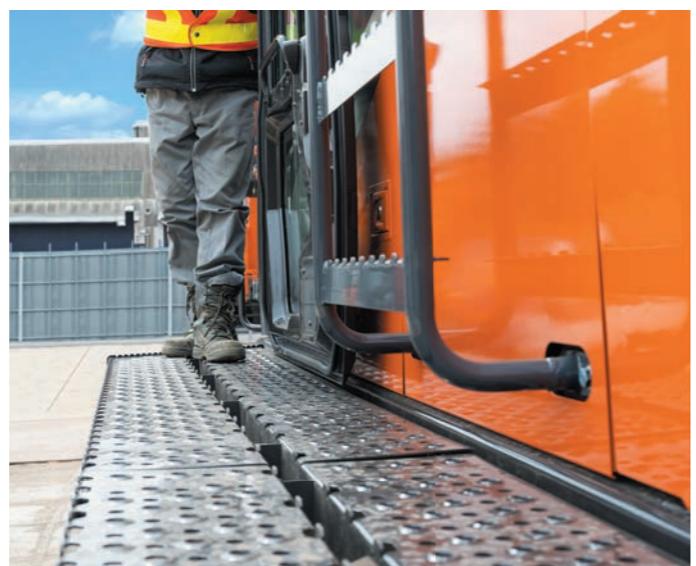

Dust-proof net on right side cover

- ✓ Provided on the cover, in front of radiator core
- ✓ Easy cleaning with compressed air

Simplified engine oil drainage

- ✓ Drain work can be done more easily by attaching a dedicated nozzle hose.

Side walk (optional)

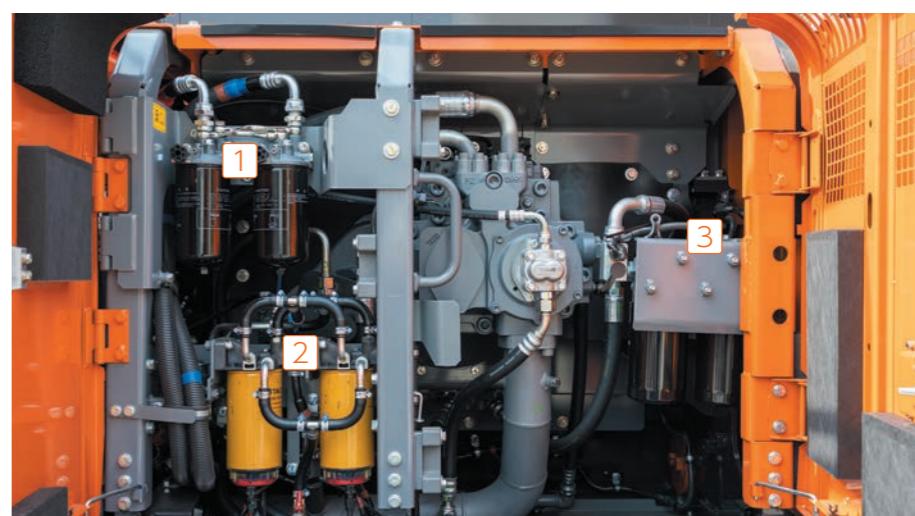

- ✓ Easy to move from cab to pump room or platform

Easy access to filters

Filter locations are concentrated in the pump room

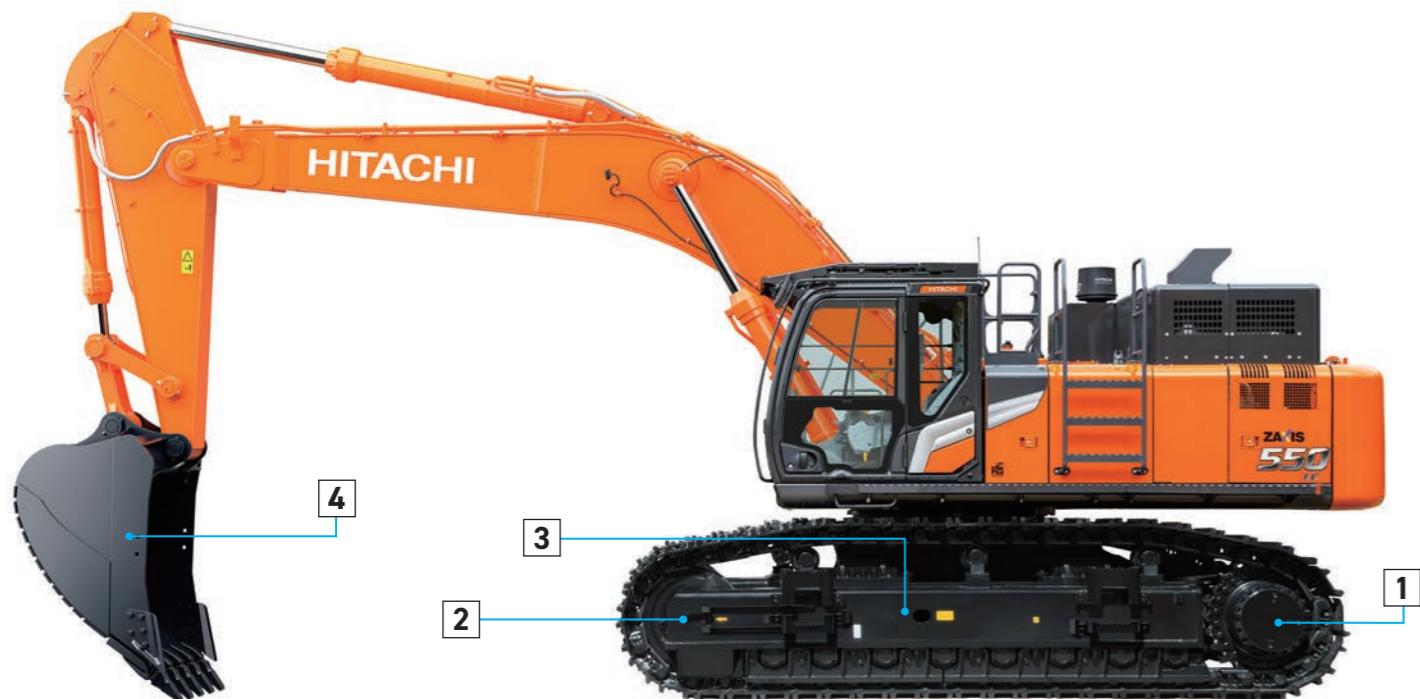

- 1 Fuel main filter
- 2 Fuel pre-filter with water separator
- 3 Engine oil filter

HIGHER PERFORMANCE

ZAXIS 550LC

The ZAXIS550LC is designed with the upper structure of the ZAXIS490 class and the undercarriage of the 60t class, combining strength and stability for reliable performance in tough conditions. Heavy-duty components—such as track rollers, idlers, and sprockets—enhance durability in harsh environments. A reinforced idler bracket with added stiffeners prevents deformation. Its compatibility with a large 4.0 m³ backhoe bucket increases material handling efficiency, boosting productivity on high-volume jobs.

1 High-traction-force travel motors

Powerful travel motors deliver strong tractive force, ensuring smooth and robust movement across challenging terrain.

2 Reinforced idler bracket

Engineered with a robust box-type structure and extra reinforcements, the idler bracket resists deformation and maintains structural integrity under heavy loads.

3 Durable undercarriage components

Featuring the same undercarriage components as 60t class—including track rollers, idlers, and sprockets—the ZAXIS550LC is built to withstand the rigors of uneven and unstable terrain.

4 Large-capacity 4.0 m³ backhoe bucket

Compatible with a large-capacity 4.0 m³ backhoe bucket, the ZAXIS550LC is built to handle large volumes of material, boosting overall operational efficiency.

MACHINE MANAGEMENT

Hitachi Construction Machinery offers a wide range of after-sales services to help you feel in total control of your fleet and workload. These initiatives give you access to vital data and tools to manage your machine.

Data report

Regular reports inform you of the machine's operation status. Emergency reports inform you of alarm information. The stable operation of the machine is further supported with two types of reports visualizing the machine's daily operation status.

A wide range of data on Global e-Service enhances efficiency.

Monthly report

Regular reports on the operating status of each machine.

Alarm report

If an emergency alarm is generated from a sensor mounted on the machine, its alarm content is reported by e-mail in a timely manner. You can receive it on your computer, mobile phone, or smartphone (communication format is via e-mail).

movie for further info.

ConSite Air

This is a service solution to diagnose machine status and update software from a remote location using OTA (Over The Air).

- Machine status, including error code display and sensor data, can be checked quickly, reducing downtime due to machine trouble.
- Software updates can be performed remotely, reducing the amount of machine downtime required.

Remote Diagnosis

Remote Software update

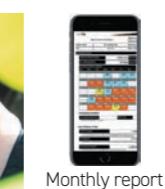

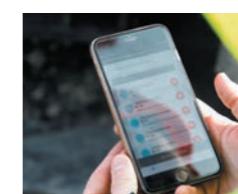

movie for further info.

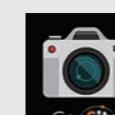

ConSite Pocket

ConSite Pocket sends you real-time alerts for issues arising with your machine. You'll receive recommendations on what to do and step-by-step help guides. The app also enables you to see the location of your fleet.

- Use your smartphone to check monthly reports, alarm reports, as well as machine operating positions.
- If an alarm report is generated, the system will notify you immediately using a push notification.

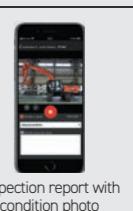

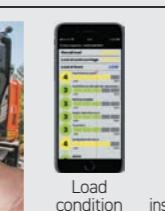

movie for further info.

ConSite Shot

This is a smartphone application that allows you to easily perform daily inspections of your machines and rental warehousing / delivery management.

- You can easily create high-quality inspection reports and share information within your company or with agents etc.
- Customers who have rental machines can also use it during rental warehousing / delivery inspections.

movie for further info.

ConSite OIL

This system detects if the oil quality has deteriorated, due to contamination or low viscosity. If this happens, you and your authorized dealer will receive an alert.

movie for further info.

MACHINE CAPACITIES

- Notes:
1. Ratings are based on ISO 10567 : 2007.
 2. Machine capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
 3. The load point is the center-line of the bucket pivot mounting pin on the arm.
 4. *Indicates load limited by hydraulic capacity.
 5. 0 m = Ground.

A: Load radius
B: Load point height
C: Machine capacity

For machine capacities, subtract installed attachment and quick hitch weight from machine capacities.

To determine lifting capacities, apply "Rating over-side or 360 degrees" machine capacities from the table and deduct weight of installed attachment and quick hitch.

Optional feature may affect machine performance.

Standard and optional equipment may vary by country, so please consult authorized dealer for details.

*1 Engine oil and hydraulic oil monitoring sensor.

*2 Hitachi Construction Machinery cannot be held liable for theft, any system will just minimize the risk of theft.

Before using a machine with a satellite or tele-communication system, please make sure that the satellite or tele-communication system complies with local regulations, safety standards and legal requirements. If not so, please make modifications accordingly.

These specifications are subject to change without notice.
Illustrations and photos show the standard models, and may or may not include optional equipment, accessories, and all standard equipment with some differences in color and features.
Before using, please read and understand the Operator's Manual for proper operation.
