

Hitachi's ZV-W Series Walk-Behind Rollers Arrive in Southeast Asia to Boost Urban Infrastructure Initiatives

Hitachi Construction Machinery Asia and Pacific (HMAP) thrilled to announce that the ZV-W Series Walk-Behind Rollers are now available across Southeast Asia. These compact yet powerful rollers, launched in early 2025, are designed to meet the growing demand for high-performance construction equipment in urban areas. With models **ZV550WL** and **ZV650W**, contractors in the region now have access to cutting-edge machinery that enhances efficiency and safety for road repairs, landscaping, and small- to medium-scale infrastructure projects.

The ZV-W Series is designed for high performance in tight urban spaces, making it ideal for confined work sites. Equipped with a 4.0 kW engine, it delivers consistent power while maintaining fuel efficiency, meeting the demand for eco-friendly equipment. The ZV550WL features a 586 mm compaction width, while the ZV650W offers 650 mm, both ensuring quick manoeuvrability and maximum coverage with fewer passes, enabling contractors to achieve efficient results with minimal downtime.

As Southeast Asia experiences rapid urban growth and an influx of infrastructure projects, governments and developers are investing heavily in road maintenance, public works, and smart city initiatives. The walk-behind roller (road roller) series provide an ideal solution for compact construction machinery, capable of handling a wide range of applications, including road repairs, landscaping and park development, sidewalk and curb compaction, and drainage and utility trenching.

The Hitachi ZV-W Series Walk-Behind Rollers demonstrate Hitachi Construction Machinery's commitment to innovative, high-performance solutions for Southeast Asia's growing infrastructure needs, supporting urban growth and reinforcing Hitachi's leadership in the construction equipment industry.
