

Introducing the ZX550LC-7G – Hitachi's New 50-Ton Class Excavator for Southeast Asia

Hitachi Construction Machinery Asia and Pacific (HMAP) is proud to announce the launch of the ZX550LC-7G, a new 50-ton class hydraulic excavator and the first ZX-7G machine of its category to be introduced in the Southeast Asia market. This significant milestone reflects HMAP's commitment to delivering high-capacity, high-performance machinery tailored to the region's unique demands.

The ZX550LC-7G was officially unveiled during Mining Indonesia 2025, held in Jakarta, Indonesia. The machine was showcased by PT Hexindo Adiperkasa Tbk- HMAP's authorized subsidiary in Indonesia. The debut attracted strong interest from industry professionals, signalling growing demand for more powerful, durable equipment in mining and heavy construction.

Exterior view of the new ZX550LC-7G

The ZX550LC-7G is built for strength and stability, combining the upper structure of the ZAXIS490-7G with the undercarriage of a 60-ton machine. This makes it well-suited for tough and high-volume job sites. It features powerful travel motors for smooth movement on rough terrain, a strong idler bracket designed to resist bending, and durable undercarriage parts for long-lasting performance. The machine also works with a large 4.0 m³ backhoe bucket* to handle more material efficiently and improve productivity.

With the launch of the ZX550LC-7G, Hitachi Construction Machinery reaffirms its role as a leader in providing innovative and reliable solutions to support the growing infrastructure and resource development needs across Southeast Asia.

For more information, reach out to your [local dealer](#) to learn more about availability and configuration options.

**It is important to note that machine specifications may vary depending on regional requirements and operating conditions.*
